Parent Programme - "Safe and Successful"

LEAP is committed to serving students by providing health and drug prevention education programmes. There have been a growing number of young people smoking, drinking and using psychotropic drugs in recent years, and abusers are starting at an earlier age. These trends cause grave concern to society. To help the younger generation stay away from the dangers of drug use and abuse,

a solid school-based education and adequate family support are both vital in the long run. In this day and age, parents feel they need to learn how to master their roles and responsibilities, strengthen the family support system, and provide their children with the necessary guidance and values at critical points of their development.
