Life CHOICE BDF100007

Community Health Organization for Intervention, Care and Empowerment Limited

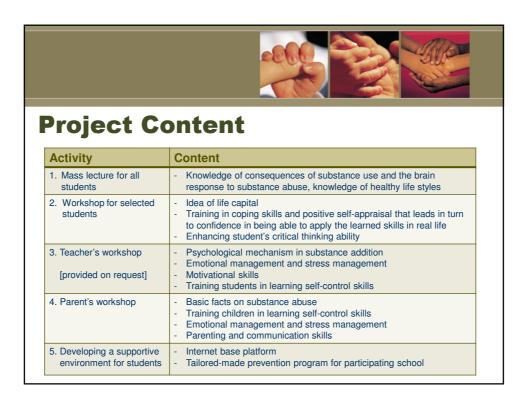

October 2010 to September 2011

Introduction

- The Community Health Organization for Intervention, Care and Empowerment (CHOICE) was formally established in 2002 as a charitable non-governmental organization mainly base on volunteer services.
- Our mission is to control the spread of sexually transmitted diseases including AIDS in Hong Kong, by establishing social networks among the vulnerable communities, promoting disease prevention knowledge within such communities as well as empowering them. We are dedicated to implement prevention measures to reduce high risk behaviors and the harms caused by such behaviours.

Parent's Workshop

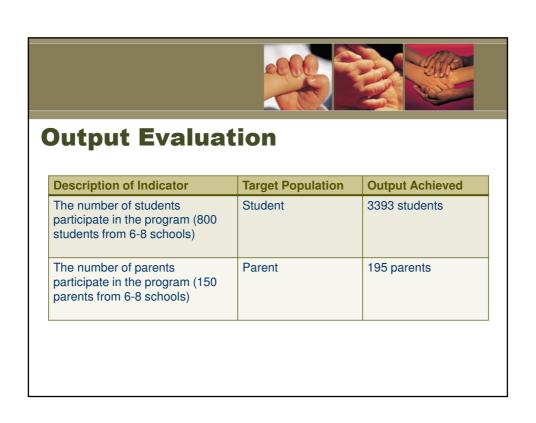

Teacher's Workshop

Output and Outcome Evaluation

Description of Indicator	Evaluation Method Used	Data Collected and Results
Participant's attitude towards drug abuse (75% show improvement or statistical significant improvement found in paired t-test)	Evaluation Question set No.1 (pre-test & post-test)	Significant improvement in participants' anti-drug attitude found (p<0.05)
	Workshop evaluation questionnaire (post-test)	Ninety five percent of parents reported improvement in communication and parenting skills

Conclusion

 The LiFE CHOICE mainly has three different intervention levels which are an individual approach, school-based approach and family approach. An individual approach is a series of workshops for selected students; school-based approach is mass lecture for all, preventive activity for individual school and internet-based support and reinforcement service; family approach is parenting workshop and supporting level is teacher's training workshop.

Conclusion

 This program is effective in modifying or enhancing personal and social competencies among the students and in increasing knowledge of parenting skill and drug awareness. It is based on the fact that the vast majority of participants like the program. The pre- and post-survey results demonstrated participants' actual improvement after attending the lecture/workshop.
