

Anti Drugs I-square Project BDF140011

Implementation Period:
6/2015 to 5/2017

Methodist Centre

Introduction

- 我支持 (I Support) 系列：來自社區人士、義務導師、大專院校學生的支援；
- 我做到 (I'm Sure) 系列：來自高危更生青少年自我的肯定；
- 我認同 (I Sense) 系列：來自年青過來人的鼓勵；
- 我轉化 (I Stimulate) 系列：來自社工的介入。

Output indicator 4	Provide anti-drug training / workshops to 40 officers of Correctional Services Department (CSD)	Staff of CSD	40 officers of CSD (at-par)

Outcome Evaluation

- 禁毒基金6號評估問卷
(前測及後測)
- 禁毒基金18號評估問卷
- 禁毒基金8號評估問卷
(後測)

Outcome Evaluation

	Description of indicator	Evaluation Method	Data Collected and Results
Outcome indicator 1	90% of high-risk youths (ex-inmates) remain drug free at three months after engaging in the programme	Beat Drugs Fund Evaluation Question Set No. 6 (Pre-test and post-test)	Received 203 questionnaires. 93.6% of high-risk youths (ex-inmates) remain drug free
Outcome indicator 2	90% of high-risk youths show improvement in anti-drug attitude	Beat Drugs Fund Evaluation Question Set No. 18 (Pre-test and post-test)	Received 201 questionnaires. 94.5% of high-risk youths show improvement in anti-drug attitude
Outcome indicator 3	90% of participants rate the anti-drug publicity activity as effective in disseminating anti-drug messages or worthwhile for attending	Beat Drugs Fund Evaluation Question Set No. 8 (Post-test)	Received 646 questionnaires. 95.9% of participants rate the anti-drug publicity activity as effective in disseminating anti-drug messages or worthwhile for attending

Experience Gained

- 計劃能夠接觸到懲教署院所的青少年，令禁毒訊息帶到給這一班高危青少年當中，顯示與其他相關專業部門合作的重要性。
- 由於當中高危青少年院所人數不穩定，禁毒工作亦需要主動接觸其他院所的青少年。

Conclusion

- 可繼續透過過來人培訓作禁毒的資源，能收更高成效。
- 於前線接觸當中，在毒品種類裡，大麻於青少年吸食的情況似乎較早前普遍，需要社會各界正視。
