

1st August 2020 to 31st July 2023

BDF190025
Happy and Healthy Family Scheme 2.0
**The Society for the Aid and
Rehabilitation of Drug Abusers**

Project Name

1. Introduction

2. Project Content

3. Output and Outcome Evaluation

4. Experience Gained

5. Conclusion

Introduction

- This project was designed for drug-using and drug-rehabilitee parents who were in needs.
- The project was successfully built up a good connection with other agencies, such as IFSCs, FCPSUs and Schools.

Project Content

- Served drug-abusing parents and drug-rehabilitee parents;
- Provided Reunion Programme and Recovery Programme for drug-abusing parents and drug-rehabilitee parents;
- Provided Relationship Enhancement Programme for drug-abusing parents and drug-rehabilitee parents and their children;

Project Content

- Formed volunteer teams among drug-rehabilitee parents and provided volunteer services, such as beach cleanup, family activities supports and free lunchbox distribution;
- Provided school talks and professional training.

Project Content

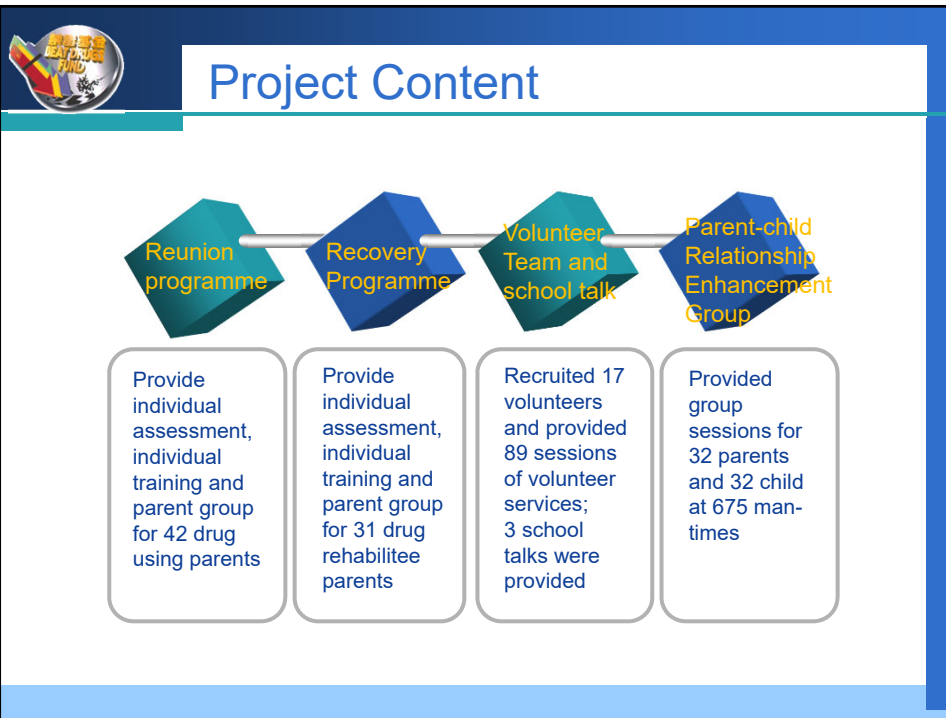

- Professional talk

- Volunteer service

- School talk

Output Evaluation

	Expected Result	Achieved Result
Output Indicator 1	<u>Reunion programme</u> Provide individual assessment, individual training and parent group for 45 drug using parents and 45 children with total attendance of 720 man-times.	Provide individual assessment, individual training and parent group for 42 drug using parents and 42 children with total attendance of 904 man-times.
Output Indicator 2	<u>Recovery programme</u> Provide recovery programme for 30 drug rehabilitee parents and 30 children with total attendance of 480 man-times.	Provide recovery programme for 31 drug rehabilitee parents and 31 children with total attendance of 787 man-times.
Output Indicator 3	<u>Parent-child Relationship Enhancement Programme</u> Provide parent-child relationship enhancement programme for 30 drug rehabilitee parents and 30 children with total attendance of 720 man-times.	Provide parent-child relationship enhancement programme for 32 drug rehabilitee parents and 32 children with total attendance of 675 man-times.

Output Evaluation

	Expected Result	Achieved Result
Output Indicator 4a	Provide 18 rehabilitee parents with 30 training sessions of volunteer training	Provide 17 rehabilitee parents with 30 training sessions of volunteer training
Output Indicator 4b	Provide 6 school talks / sharing sessions to 100 students	Provide 6 school talks / sharing sessions to 448 students
Output Indicator 4c	Provide 60 volunteer service sessions for 18 rehabilitee parents to engage them in	Provide 89 volunteer service sessions for 17 rehabilitee parents to engage them in
Output Indicator 5	To provide 3 sessions of professional training to 75 social workers	To provide 3 sessions of professional training to 69 social workers

Outcome Evaluation

	Expected Result	Achieved Result
Outcome Indicator 1	Drug using parents reduce drug use after engaged in the project 70% of participants reduce in drug use frequency after completing training	85.71% of participants reduced drug use frequency
Outcome Indicator 2	Rehabilitee parents show improvement in self-efficacy to refuse drug use 70% of participants show improvement in self-efficacy to refuse drug use after completing training or statistical significant improvement in participant's self-efficacy to refuse drug use	76.3% of participants indicate reduction in drug use desire 75.0% of participants indicate reduction in relapse risk 76.3% of participants indicate reduction in important to remain drug free 78.8% of participants indicate increase in chance of resisting drug

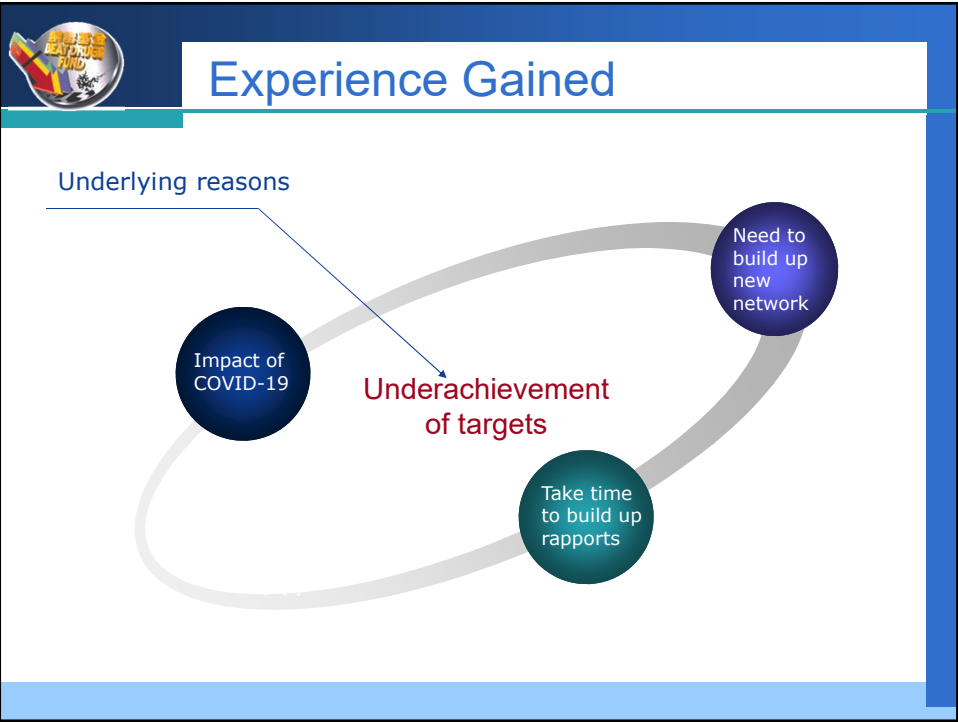

Outcome Evaluation

	Expected Result	Achieved Result
Outcome Indicator 3	<p>Drug using and rehabilitee parents show improvement in parenting self-efficacy</p> <p>70% of participants show improvement in parenting self-efficacy after completing training or statistical significant improvement in participant's parenting self-efficacy</p>	<p>95% of participants indicate improvement in parenting self-efficacy</p>
Outcome Indicator 4	<p>Rehabilitee parents show improvement in self-efficacy</p> <p>70% of participants show improvement in self-efficacy after completing training or statistical significant improvement in participant's self-efficacy</p>	<p>80% of participants indicate improvement in self-efficacy</p>

Outcome Evaluation

	Expected Result	Achieved Result
Outcome Indicator 5	<p>Students show improvement in anti-drug attitude</p> <p>70% of participants show improvement in anti-drug attitude or statistical significant improvement in student's anti-drug attitude</p>	<p>57.7% showed improvement in anti-drug attitude</p> <p>Statistically significant improvement found in self-efficacy to refuse drug use as indicated by paired t-test</p>

Experience Gained

More Supports

Drug-using and drug-rehabilitee parents need more supports to make improvement

Use of resources

Project Assistant and Volunteer can help to relief the resistance of drug-abusing and rehabilitee parents

School talk

In this project, we discovered that a lot of schools need anti-drug talks for their students, we built up the network in this project to promote anti-drug messages

Conclusion

- Drug-using and Drug-rehabilitee parents need extra support for their drug-treatments; School talk is essential in the service to promote anti-drug message;
- Beat Drug Fund is better to offer more contribution to this categories, even if mainstream service already had provided basic services.
